Windows Development

Windows Mobile puts the power of Microsoft Windows right into your pockets. Windows is traditionally the biggest operating system player in market. Windows system provides seamless integration with its own family of Office, Database, Enterprise tools etc. With Windows 8 family the gap between mobile/tablet operating system and desktop versions has zeroed down. Windows Mobile is compact operating system combined with a suite of basic windows applications for windows mobile devices.

Avance' team of windows mobile developers with their wide experience has created a strong track record in Windows Mobile 5/6/7/8. We build and maintain different kinds of custom windows mobile based apps as per your business specific needs. Avance has been developing Software for Windows Mobile Applications that are being used by wide range of consumers ranging from Enterprise users to mass consumers. Avance team of Windows Mobile developers have good experience and knowledge in Windows Mobile application development using Windows Mobile and Windows Mobile-supported technologies, and all the inbuilt features including location service and Touch interface.

Our technical expertise includes:

- Rich API support (messaging, telephony, connectivity, music, video, Bluetooth, gaming).
- Mobile Social Networking.
- Local Search/ location Search
- Streaming multimedia application on Windows Mobile.
- One-stop service provider: all mobile, desktop and web/server platforms.

Product Portfolio

1. Enterprise Resource Planning(Sales, Purchase, Inventory, Financial Accounting)

.Net Windows Based Project.

Enterprise resource planning (ERP) is business management software that allows an organization to use a system of integrated applications to manage the business. ERP software integrates all facets of an operation, including product planning, development, manufacturing processes, sales and marketing.

Enterprise resource planning software, or ERP, does not live up to its acronym. Forget about planning it does not do much of that—and forget about resource, a throwaway term. But remember the enterprise part. This is ERP's true ambition. It attempts to integrate all departments and functions across a company onto a single computer system that can serve all those different departments' particular needs.

We are an ERP Software provider company in Hyderabad, Andhra Pradesh State, India. We provide ERP software worldwide. The ERP Software's have been well received and rank high in meeting user expectations. We are specialized and expert in Customized ERP Solutions for different customers.

2. School Management System

.Net Web based portal for school management.

This project is developed and implemented for School management; this project covers all the functions of all departments.

and students, like Registration (Student, Teaching Staff and Non-Teaching Staff etc.,) department wise. SMS will be sent to parents regarding exam schedule, Events, Annual Day, Sports Day etc., Timetable Of both faculty and Students, Exams Schedule, Adding Attendance to faculty and approving the status of both teaching and nonteaching staff will be maintained within the project .All data must be secure and unauthorized access must not be allowed.

3. Point of Sale

.Net Windows Based Project (Running).

Point of sale, or POS as it is more commonly abbreviated, refers to the capturing of data and customer payment information at a physical location when goods or services are bought and sold. The POS transaction is captured using a variety of devices which include computers, cash registers, optical and bar code scanners, magnetic card readers, or any combination of these devices.

4. Online Shopping

.Net Web Based project for shopping

The act of purchasing products or services over the Internet. Online shopping has grown in popularity over the years, mainly because people find it convenient and easy to bargain shop from the comfort of their home or office. One of the most enticing factor about online shopping, particularly during a holiday season, is it alleviates the need to wait in long lines or search from store to store for a particular item.

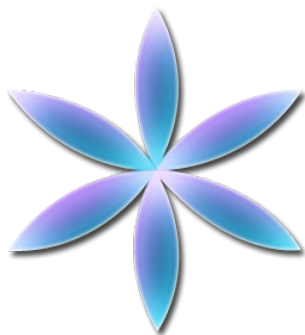

5. Hospital Management Portal

.Net Web Based project for Hospitals.

6. Store Management System

.Net Web Based project for stores and dealers.
